Low frequency earthquakes among the aftershocks of Iwate-Miyagi Nairiku earthquake in 2008 Masahiro KOSUGA and the Group for the aftershock observations of the Iwate-Miyagi Nairiku Earthquake in 2008	1
Estimation of average S-wave velocities at Morioka City by using surface wave microtremor array survey -Relation between the average S-wave velocities and seismic intensities by questinary survey- Hiroyuki OKADA, Hidekazu YAMAMOTO and Tsuyoshi SANO	7
Site amplification characteristics at the strong motion observation sites in Iwate Prefecture Shunya SATO, Hidekazu YAMAMOTO and Tsuyoshi SANO	13
Study of the wooden houses damage related to ground motion characteristics due to the 1896 Rikuu and the 1914 Akita Senboku earthquakes - Comparison between collapses rate of houses and predominant period of H/V spectral ratio of microtremors - Toshihiko MIZUTA, Mami FUJII and Hiroshi KAGAMI	19
The effect of non-linear seismic response of fill land to damage of buildings Kazuya MITSUJI, Kazuo MATSUKAWA and Masaki MAEDA	25
The development of the landslide at Oami region Akira KUMAGAI and Katsurou MAEKAWA	31
Study of Earthquake Resistant Index of Wooden Houses by old and new Examination Standards Takayuki MIZUNO, Masayuki HANDOU, Fujio KASAMATSU and Tomomi FUJITA	37
Development of Real-Time Disaster Information Collection System Using Terminal Built-in Sensors Tohru OKAMOTO, Akihiro SHIBAYAMA and Susumu OHNO	41
An interview to the residents and administration person concerning with slope failure dangerous housing relocation support promotion support system in Iwate Prefecture..... Michiya IRASAWA and Nagisa MEGURO	47
Tornado disaster in Noshiro City on October 30, 2009 Yasushi UEMATSU and Akihiro TAKAHASHI	53
Secure road network system against earthquake taking road surface conditions into consideration in snowy areas Munetaka ISHIDE and Masafumi HORII	59
Study on human evacuation considering an injured person in a high-rise building for earthquake disaster Hiroki ITO, Akihiro SHIBAYAMA and Susumu OHNO	63
Field test on the lodging, uprooting and breaking of coastal trees - Examples of casuarina in Indonesia - Hideo MATSUTOMI, Kenji HARADA and Aloysius Bagyo WIDAGDO	69
The 2010 Mentawai Earthquake tsunami and mode of coastal tree failure..... Hideo MATSUTOMI, Kenji HARADA and Subandono DIPOSAPTONO	77
Aspects of the 2010 Chile Earthquake Tsunami..... Hideo MATSUTOMI, Kenji HARADA, Toshinori OGASAWARA and Shunichi KATAOKA	83
Study on tsunami propagation into rivers Min ROH, Xuan Tinh NGUYEN and Hitoshi TANAKA	89
Experiments on inundation flow with floating objects under the condition of a movable bed Takashi SOMA, Miki AZUMA and Hideo MATSUTOMI	95
Stability of detached breakwater against tsunami..... Minoru HANZAWA, Akira MATSUMOTO and Hitoshi TANAKA	101
Sediment deposit in Lake Tuni, Bolivia Hitoshi TANAKA and Ramiro PILLCO	107
Precipitation and runoff characteristics around the Lake Tuni in Bolivia Yasuyuki ISHIGAKI, Yoshihiro ASAOKA, Keiko UDO and Akira MANO	113
Observations of water quality in Tuni Lake basin Makoto UMEDA and Marcelo GORRITTY	119
Study on the factors affecting the increase of 2-MIB concentration in Kamafusa Reservoir Atsushi SUZUKI, Makoto UMEDA and Masahiko MATSUKAWA	123
Water quality modeling in Miharuru Reservoir Duong Hai THUAN and Makoto UMEDA	129
Study on resuspension of sediment in Lake Izunuma caused by wind induced current Yusuke BETTO and Makoto UMEDA	135
Numerical simulation of water temperature distribution in the dam with different hydrological conditions Yuta OCHIAI and Makoto UMEDA	141
On the system of strong rain Akira WATANABE	147
Hourly hydrograph separation for the Abukuma river based on numerical filter technique and water quality data Tomohiro HAGA and Yoshiyuki YOKOO	153
Investigating physical and chemical profiles of snow cover and temporal variation of snowmelt water chemistry for understanding snowmelt processes Masaya ANDO and Yoshiyuki YOKOO	159
Effects of geographic characteristics of watersheds on the flow regimes in Japanese mountainous areas Ryo KIMURA, Yuri ESAKA and Yoshiyuki YOKOO	165
Development of Inland flood potential map due to extreme rainfall in Fukushima prefecture Seiki KAWAGOE, Toshinaga OHTA and Yuta SATO	171
Field observations used to river topographical survey at Kotogawa river Kazushi NOMURA, Kento KIMURA, Akira TOKUDA and Kazuya WATANABE	177
Experimental study on deposition and scoring around weir equipped with sluiceway Hajime MIWA	183
Development of high accuracy calculation of 2D flow by finite volume method Arata HIGASHIDA, Keiko UDO and Akira MANO	189
Defensive effects of a breakwater combining submerged breakwater and horizontal plate..... Kairi MORISZAWA and Yoshihiro TSURUMOTO	195
Prediction of Shoreline Retreat during Sea Level Rise in Japan Taichi SUGAWA, Keiko UDO, and Akira MANO	201
Sand spit decline at the Sagami River mouth Yinghao LI, Eko PRADJOKO and Hitoshi TANAKA	207
Toward improving prediction of sediment transport over wave-induced ripples Rafic ABSI and Hitoshi TANAKA	213
Study on aquatic environment of Lake Jusan in investigating LCA Mikio SASAKI, Hitoshi TANAKA and Makoto UMEDA	219
Investigation of floc transport from Nagase river mouth Kazuki AOYANAGI, Hitoshi TANAKA, Makoto UMEDA, Yutaka FUJITA and Susumu KANAYAMA	225
