	Page
An analysis of victims caused by heavy rainfall disasters in Japan from 2004 to 2014.	Mototyuki Ushiyama 1
Quantitative evaluation of human and building damage in the Leyte island of the Philippines by typhoon No.1330 (Haiyan)	Keigo Kato, Akira Mano, Keiko Udo and Shuichi Kure 7
Risk evaluation of mud flood potential for Japanese Islands	Keisuke Ito, Hatsumi Wakabayashi and Seiki Kawagoe 13
Relationship between rainfall density and sediment transportation in Fukushima seaside area	Seiki Kawagoe, Yuma Munakata and Hiroaki Tamura 19
Estimated snow characteristic distribution base on field survey in Agano river	Kota Inoue, Ayumi Suzuki and Seiki Kawagoe 25
Issues of current preventive measures against expansion of the damage due to Typhoon Haiyan in Eastern Visayas, the Philippines	Jun Yoshida, Daisuke Konno and Tadashi Isozaki 31
Practical Education program in affected areas for improving response capability to survive from tsunami and storm surge	Mari Yasuda, Fumihiko Imamura, Anawat Suppasri, Rui Nouchi and Carine Yi 37
Source model for the 2011 North Akita earthquake to evaluate strong ground motions	Shunichi Kataoka and Shunichi Fukumoto 41
Later phase from the triggered earthquakes near the Moriyoshi-zan volcano in Akita Prefecture	Masahiro Kosuga 47
Discussions on ground motion characteristics of central area of Yamagata city.....	Mitsuji Kazuya 53
On-site investigation report of the M6.5 Zhaotong Earthquake, Yunnan, China	Xin Wang, Qiang Ma, Hongjun Shi, Ji Dang and Hao Wu 59
Relationship between the shoreline position changes in the back region of large scale offshore structure and its adjacent coast - Example on the Michikawa coast in Akita -	Hideo Matsutomi and Kai Kaginushi 65
Characteristics of shoreline in Misawa coast after countermeasures for beach erosion	Tomoki Saito and Mikio Sasaki 69
Shoreline change analysis through images from camera monitoring on Nha Trang coast, Vietnam.	Tran Minh Thanh, Yuta Mitobe, Vo Cong Hoang, Nguyen Trung Viet and Hitoshi Tanaka 75
Morphological change on Cua Dai Beach, Vietnam: Part I image analysis	Nguyen Trung Viet, Vo Cong Hoang and Hitoshi Tanaka 81
Morphological change on Cua Dai Beach, Vietnam: Part II theoretical analysis	Vo Cong Hoang, Nguyen Trung Viet and Hitoshi Tanaka 87
Analysis on morphological recovery of tsunami-induced concave shoreline.....	Vo Cong Hoang, Hitoshi Tanaka and Yuta Mitobe 93
Pre- and post- tsunami morphology changes on Kodanohama Beach	Hoang Dong Hai, Yuta Mitobe, Vo Cong Hoang, Nguyen Trung Viet and Hitoshi Tanaka 99
Rough method for estimating tsunami height in a bay with islands located at the bay mouth - Case of the Matsushima bay -	Hideo Matsutomi 105
Simple method for estimating the maximum inundation depth at the front of wide RC building with aperture	Hideo Matsutomi and Nanako Ono 109
Change in Longshore Sediment Transport behind Detached Breakwaters due to Tsunami	Fumiaki Mori, Yuta Mitobe and Hitoshi Tanaka 115
Analysis of the geomorphic change and the structural damage due to Tsunami	Tsuyoshi Nagasawa and Hitoshi Tanaka 121
Suffer example of river wall in tidal river.....	Takehito Horie, Keisuke Shimazaki and Hitoshi Tanaka 127
Numerical simulation of run up tsunami in the model of Kitakami River	Aoyama Yasuhisa, Mohammad Bagus Adityawan, Mitobe Yuta and Tanaka Hitoshi 133
Paleo tsunami source estimation by using combination optimization algorithm - Case study of The 1611 Keicho earthquake tsunami -	K. Imai, T. Maeda, T. Inuma, Y. Ebina, D. Sugawara, F. Imamura and A. Hirakawa. 139
Investigation of Tsunami Evacuation using Floating Type Tsunami Evacuation Shelter on the building	Yuichi Kaneko and Kazuya Watanabe 145
Study on Damage Mechanism of RC Frame with Steel Roof Structure based on 3D analysis	Masayuki Handou, Tomomi Fujita, Atsushi Suzuki and Junichi Shibuya 151
Relation between damage of wooden houses during the 1894 Shonai earthquake and H/V spectral ratio of microtremors ...	Toshihiko Mizuta and Hiroshi Kagami 155
Vibration characteristics by microtremor measurements at new base isolation buildings in Aobayama campus of Tohoku University	Susumu Ohno, Hiroyuki Uenoyama, Ryosuke Tsuruta, Hiroki Ishizuka and Satoru Koike 159
Damage to structures due to heavy snow during February 14 to 16, 2014 - Mainly on the damage to carports and greenhouses in Gunma Prefecture -	Yasushi Uematsu 165
Downstream morphology change along the Porong River after discharging mud from volcano eruption	Hitoshi Tanaka, Fumiaki Mori, Makoto Umeda, Shuichi Kure, Yuta Mitobe and Suntoyo 171
Effects of Mud Volcano Eruption on Porong River Environment, Indonesia	Shuichi Kure, Makoto Umeda, Hitoshi Tanaka, Keiko Udo, Akira Mano and Suntoyo 177
Investigating scale dependency of rainfall-runoff process in terms of watershed-scale storage estimation method	Takahiko Chiba and Yoshiyuki Yokoo 183
Estimating runoff processes of Cs-137 in catchment area of wastewater treatment plant in Fukushima prefecture	Yudai Shikano and Yoshiyuki Yokoo 189
Estimating the number of dominant processes in rainfall-runoff processes	Yushi Kanno and Yoshiyuki Yokoo 195
Estimating rainwater storage and discharge processes of inflow to the Bishamon pond in Fukushima	Daiki Fujimoto and Yoshiyuki Yokoo 201
Hydrological monitoring and data analysis for estimating runoff processes of inflow to the Bishamon pond in Fukushima	Shoya Hirose and Yoshiyuki Yokoo 207
On the regularity of Japanese watershed topography	Takahiro Suzuki and Yoshiyuki Yokoo 213
Investigation of Tidal Discharge and Salinity Intrusion due to Winter Storm Waves at the River Mouth of Akita Prefecture	Yushi Imai, Takuya Okonogi and Kazuya Watanabe 219
Study of the morphological development around river mouth in Lake Tuni, Bolivia	Gabriela Sossa Ledezma, Hitoshi Tanaka and Yuta Mitobe 225
Influence of water environment on growth of <i>Corbicula japonica</i> in Lake Jusan	Aki Nishimura, Makoto Umeda, Hitoshi Tanaka and Mikio Sasaki 231
Perpendicular structure of salt water moved into Lake Jusan	Akihiro Ichizawa, Mikio Sasaki, Hitoshi Tanaka, Makoto Umeda and Aki Nishimura 237
Observation and analysis of the seasonal dynamics of algae caused water bloom in reservoir	Hiroto Sato, Makoto Umeda and Takayuki Horii 243
Field measurements on macrophyte vegetation in Lake Izunuma.....	Makoto Umeda, Shinya Nakada, Tetsuro Shimada and Yasufumi Fujimoto 249

Tohoku Research Group for Natural Disaster Science
