

Tohoku Journal of Natural Disaster Science

Volume 52

March, 2016

ARTICLES

	Page
Estimating rain-water storage at watershed-scale on the occurrence of sediment disaster in the Tohoku region, Japan	Shintaro Abe and Yoshiyuki Yokoo 1
Investigating rainfall-runoff mechanisms in the watershed of the Bishamon pond, Ura-bandai, Japan	Atsushi Sugawara and Yoshiyuki Yokoo 7
Relationships between changes of dominant rainfall-runoff components and water quality indices in the watershed of the Bishamon pond Ura-Bandai, Japan	Kouki Minakawa and Yoshiyuki Yokoo 13
Scale dependency of rainfall-runoff processes in the watersheds of the Tohoku region, Japan	Akira Kato and Yoshiyuki Yokoo 19
Developing a simple model for estimating pH of the lake Inawashiro and its application	Ryo Hasunuma and Yoshiyuki Yokoo 25
Estimating monthly forest fire occurrences in the Tohoku region, Japan	Junya Kanno and Yokoo Yoshiyuki 31
Quick estimation reports of Kanto · Tohoku heavy rainfall disaster -Hisawa river water damage in Minami Aizu.....	Seiki Kawagoe and Naoya Imazumi 37
Development of water area distribution information by using historical geographic map at Fukushima University	Kazuki Orikasa, Kesuke Ito and Seiki Kawagoe 43
Impact assessment of evapotranspiration on river runoff in the Abukuma River basin	Yuki Hashimoto and Yoshihiro Asaoka 49
Toward standardization of on-site surveys of river flood disasters : damage classification of residential houses	Shuichi Kure, Junji Yagisawa, Kazuaki Otsuki, Hiroyuki Nagano and Yasuo Nihei 55
Flood Inundation Simulation of Shibui River on September, 2015	Nobuyuki Sugii, Shuichi Kure and Keiko Udo 61
Estuarine morphological changes due to the 2015 Kanto-Tohoku Heavy Rainfall and their subsequent recovery	Hitoshi Tanaka, Yuta Mitobe and Vo Cong Hoang 67
Evaluation of snow cover duration over Japan derived from satellite remote sensing and probability density function	Tsubasa Saito and Yoshihiro Asaoka 73
Long term change in snow water equivalence distribution in the Agano River basin	Takeshi Sato and Yoshihiro Asaoka 79
Development of a stochastic model for predicting wind-induced damage to wooden houses in snowy cold region : Experiment on wind resistance of roof frame joints	Sachiko Yoshida, Daisuke Konno, Eri Gavanski and Yasushi Uematsu 85
Sensitivity analysis of runoff with tropical glaciers decline in the Andes.....	Shota Funaki, Yoshihiro Asaoka and Tsuyoshi Kinouchi 91
Evaluation of future algal growth potential in water resources reservoirs	Daisuke Shimizu, Makoto Umeda and Yasuno Sawamoto 97
Improvement of inundation analysis simulation using information on city planning in the Koriyama city	Kota Kozawa, Yoshihiro Asaoka, Hisao Nagabayashi and Masahiro Tezuka 103
Measurements of water quality in a shallow eutrophic lake in Hanoi, Vietnam	Makoto Umeda, Le Thi Thanh Thuy and Nguyen Trung Viet 109
Examination of wave prediction accuracy in the sea of Japan for winter season	Tsuyoshi Kotoura and Hitoshi Tanaka 115
Examination of ocean wind estimating technique using SMB method and Toba 3/2-power law	Yuya Takahashi and Kazuya Watanabe 121
Characteristics of shoreline in Misawa coast in 2015	Hirotoshi Tsushima and Mikio Sasaki 127
Perpendicular structure of salt water moved into Lake Jusan (No.2)	Y. Suzuki, M. Sasaki, H. Tanaka and M. Umeda 133
Application of Simulating WAVes Nearshore (SWAN) model for wave simulation in Gulf of Thailand	Wongnarin Komporn, Hitoshi Tanaka, Chaiwat Ekkawatpanit and Duangrudee Kosittittiwong 139
Long-term morphological change on Darang Coast, Vietnam	Nguyen Trong Hiep, Hitoshi Tanaka, Yuta Mitobe, Nguyen Trung Viet and Vo Cong Hoang 145
Temporal variation of shoreline positions on Cua Dai beach, Vietnam.....	Dinh Van Duy, Hitoshi Tanaka, Yuta Mitobe and Nguyen Trung Viet 151
Effect of Climate Change on HOKKAIDO FISHERIES, JAPAN	Takehito Horie and Hitoshi Tanaka 157
A study on event deposits in coastal lowlands on the western coast of Oga city, Akita Prefecture	Shinya Takabuchi, Takanobu Kamataki, and Hideo Matsutomi 163
Event deposits recorded in coastal lowland on the northern part of Akita Prefecture, the eastern margin of Japan Sea	Takanobu Kamataki, Shinya Takabuchi, Hideo Matsutomi, and Kohei Abe 169
Classification of Velocity Field around landward toe of Coastal Dikes induced by Tsunami Overflow	Kaneko Yuto, Mitobe Yuta, Otsushi Kazutaka, Kurosawa Tatsuki, Komori Daisuke and Tanaka Hitoshi. 175
A method for estimating the reflected tsunami inundation depth at the front of RC building with a connection space and aperture	Hideo Matsutomi, Tomoe Konno and Shunsuke Takao 181
Influence of the density of tsunami flooding water on tsunami deposit and run-up height	Hideo Matsutomi, Fumiko Konno and Satoru Saikawa 187
Dependency of the vertical tsunami force acting on RC building on the gap interval between a low vertical protective wall and the RC building	Hideo Matsutomi and Natsuki Tomaru 193
Experiments of tsunami force acting to an object on bridge.....	M. Muraoka and M. Sasaki 199
The effect to numerical simulation accuracy of run up tsunami by overflow of embankment	Aoyama Yasuhisa, Mitobe Yuta, Komori Daisuke and Tanaka Hitoshi 205
Study on seismic evaluation and retrofitting of steel gymnasiums in Tohoku region	Daisuke Konno, Kei Watanabe and Yasushi Uematsu 211
Evacuation Behavior of Students in the School Building of SNCT at Disaster Happening using Artificial Society Simulation Model	Masayuki Handou, Satoshi Hongo and Erika Kuroda 217
Study on crowd evacuation behavior using a model integrating Potential model and Social Force model	F. Makinoshima, F. Imamura and Y. Abe 223
Study of snow damage simulator using multi-agent model	Toshihiko Mizuta 229
Evaluation of sheltering potential based on actual behavior of residents in the 2011 Great East Japan Earthquake	Takanori Kimura, Kyota Hamaoka and Takeshi Sato 233
Part1: Overview and the results of the questionnaire survey in Sendai City	Takanori Kimura, Kyota Hamaoka and Takeshi Sato 233
Evaluation of sheltering potential based on actual behavior of residents in the 2011 Great East Japan Earthquake	Kyota Hamaoka and Takeshi Sato 237
Part2: Study of sheltering factors using the survey results	Kyota Hamaoka and Takeshi Sato 237
The right processing method for utilizing a disaster Archives	Akihiro Shibayama and Sebastian Penmellen Boret 241
Study on on-site early warning for Tsunami	Shunichi Kataoka, Kou Sumita and Yuuka Koshiduka 245
Why building damage concentrated to Longtoushan Town during the Ms6.5 Ludian Earthquake	Xin Wang, Susumu Kurahashi, Hao Wu, Hongjun Si, Ji Dang and Kojiro Irikura 251
Estimation of S-wave velocity structures in Kuji City by microtremor observations.....	H. Yamamoto, T. Ishikawa and T. Saito 257
Seismic interferometry analysis of microtremors observed in linear array with broadband seismometers in Fukushima Prefecture	H. Yamamoto, F. Sato and T. Saito 263
Real time prediction of spectral information using the assimilation technique	Daisuke Tatebayashi and Masato Motosaka 269

Tohoku Research Group for Natural Disaster Science
