

Tohoku Journal of Natural Disaster Science

Volume 53

March, 2017

ARTICLES

	Page
Event deposits recorded in coastal lowland on the southern part of Akita Prefecture, the eastern margin of Japan Sea Takanobu Kamataki, Norifumi Abe, Shin Kanazawa and Hideo Matsutomi	1
Event deposits recorded in coastal lowland areas of Ajigasawa Town, Aomori Prefecture Shuhei Kumagai, Koji Umeda, Takanobu Kamataki, Naoto Koikiwa and Natsuko Fujita	7
Study on Recovery Process of Bathymetry of Sendai Bay after the 2011 Tsunami Shintaro Saegusa, Hitoshi Tanaka and Yuta Mitobe	15
Quantitative experiments on the density of tsunami flooding water Fumiko KONNO, Hideo MATSUTOMI, Koki ATOMURA and Kota KONDO	21
Investigation of Tsunami Evacuation Using Floating Type Tsunami Evacuation Shelter on the Building Ryuya Fuji and Kazuya Watanabe	27
Study on energy dissipation in WAM model Tsuyoshi Kotoura and Hitoshi Tanaka	33
Channel Sedimentation at a Fishery port in FUNKA BAY, JAPAN Takehito Horie, Yasuji Nozaka and Hitoshi Tanaka	39
An empirical study on the relationship between the trend of shoreline position change and the scale of sea area structures on the Akita Southern Coast Kai KAGINUSHI and Hideo MATSUTOMI	47
Analysis of erosion and accretion waves on Cua Dai Beach in Central Vietnam Dinh Van Duy, Hitoshi Tanaka, Yuta Mitobe, Nguyen Trung Viet and Le Thanh Binh	53
High-frequency UAV monitoring of beach and wave Akihiro Suzuki, Yuta Mitobe and Hitoshi Tanaka	59
Characteristics of Shoreline in Misawa Coast in 2016 Wataru Sato and Mikio Sasaki	65
Observation of sand spit development at Cua Lo River mouth, Central Vietnam Dinh Van Duy, Hitoshi Tanaka, Yuta Mitobe and Nguyen Trung Viet	71
Study on salt water movement in Ogawara Lake T. Komura, M. Sasaki and S. Kunugi	77
Investigation of Salinity Intrusion at the Koyoshi River Akiho Konaka and Kazuya Watanabe	83
Proposal of $\kappa - \epsilon$ Turbulent Model in High Reynolds Number Flow with Vegetation Yoshinari Hirata, Shuichi Kure, Keiko Udo and Akira Mano	89
Study on prediction of turbidity in reservoirs under future environmental changes Rikushi Yasumatsu and Makoto Umeda	95
Measurement of current velocity variations in a thermally stratified reservoir Naoki Mizuta, Makoto Umeda and Humihiko Kobori	101
Applicability of the Curve Number Method for estimating flow duration curves in the Humid Tropics Chris Leong and Yoshiyuki Yokoo	107
Winter operational test of unmanned observation devices in Mt. Zao Ryosuke Yajima, Genki Yamauchi, Takuro Daimaru, Hikaru Otsuka and Miwa Kuri	113
On the 830 Tencho Earthquake Mitsuo NOGOSHI, Ryouichi NAKAMURA and Shusuke OHJ	121
Literature survey on damage of hot springs due to the 1896 Rikuu earthquake Toshihiko Mizuta and Hiroshi Kagami	127
Tracing for footprints on reconnaissance reports of 1896 Rikuu earthquake Hiroshi Kagami and Toshihiko Mizuta	133
Spatiotemporal variation of triggered seismicity in Akita prefecture after the Tohoku-oki earthquake Masahiro Kosuga	139
Applicability of seismic interferometry analysis to array records of three-component microtremors observed in Iwate University M. Hiraka, H. Yamamoto, T. Saito, K. Keiji and F. Sato	145
Estimation of phase velocities of Love wave from array records of horizontal microtremor by using FK analysis H. Yamamoto, K. Kanezaki and T. Saito	151
Seismic interferometry analysis of short-period microtremors observed with a linear seismometer array for estimating two-dimensional shallow S-wave velocity structures - An experiment in a ground of Iwate University - H. Yamamoto, K. Sasaki and T. Saito	157
Seismic interferometry analysis of microtremors observed in linear array with broadband seismometers in Fukushima Prefecture Part 2 F. Sato, H. Yamamoto and T. Saito	163
Collapse procedure under wind or snow loading and effect of reinforcement on the wind and snow resistance of pipe-framed greenhouses Yasushi Uematsu and Kazuya Takahashi	169
Effect of opening size and wind speed on the internal pressure of a low-rise building caused by sudden opening Daisuke Konno, Yasushi Uematsu and Eri Gavanski	175
Numerical simulation of internal pressure of vent layer in ventilated exterior wall systems of a low-rise building Kei Watanabe and Yasushi Uematsu	181
Characteristics of strong wind in the lower atmosphere Akira Watanabe	187
Development of a stochastic model for predicting wind-induced damage to wooden houses in snowy cold region based on the wind-resistant performance of roof frame joints Sachiko Yoshida, Konno Daisuke, Eri Gavanski and Yasushi Uematsu	193
Review of recent water-related disasters in Tohoku region and future challenges for disaster risk reduction Shuichi Kure, Shuji Moriguchi, Shosuke Sato, Keiko Udo and Yasuhiro Jibiki	199
Flow situations inferred from the watermarks of flooding at Otomo area and its upstream reach in Iwaizumi caused by the Typhoon No.10 in 2016 Hideo MATSUTOMI, Fumiko KONNO and Takanobu KAMATAKI	205
Beach morphological changes on Sendai Coast induced by Typhoon No. 10, 2016 Yuta Mitobe, Hitoshi Tanaka, Akihiro Suzuki, Makoto Umeda, Daisuke Komori and Yoshiya Touge	211
Investigation on disaster prevention awareness of the junior high school students in the coastal area of Akita Prefecture Shingo Yasuda, Takanobu Kamataki and Kazuya Watanabe	217
Disaster education in Faculty of Education, Arts and Science in Yamagata University: its achievements and challenges Yoshiyuki Murayama	223
Changes in disaster research theme by group activities at Super Science High School Yoshi Abe and SSH Research Division of Sendai Daiichi High School	229
Instruction for writing a manuscript of Tohoku Journal of Natural Disaster Science Miwa Kuri	235
