Local Publications Issued Just After the 1894 Schonai Earthquake: Focusing on the Book of “Overview of the Earthquake and Flood in Yamagata Prefecture” Hiroshi KAGAMI and Toshihiko MIZUTA	1
A Study of Earthquake Damage in Shonai District Caused by the 1964 Niigata Earthquake – Reports Published in Tsuruoka and Sakata Cities – Toshihiko MIZUTA and Hiroshi KAGAMI	7
Simple Estimation of the Natural Periods of Wooden Houses Using Seismic Response Waveforms from Dynamic Analysis Mai TAGUCHI, Naofumi TERAMOTO	13
Realtime Prediction of Strong-Motion Spectra Using Machine Learning for Tohoku Region Susumu OHNO	17
Estimating Sub-Soil Structure at JMA Goshogawara Sakaemachi Station, Aomori, Japan Shunichi KATAOKA	23
Displacement of the Western Flank of Mt. Iwaki by InSAR and Its Relationship to the Okkomori Fault Ryosuke DOKE and Hideki KUROSAWA	29
An Attempt to Determine Earthquake Location Using Variable Moho Depths Masahiro KOSUGA	35
Liquefaction Damage and Dynamic Soil Properties in Fushiki, Takaoka City by the 2024 Noto Peninsula Earthquake Atsushi MIURA, Kazuya MITSUJI, Atsuhiko OGUNI	41
Tsunami on the Northern Coast of Noto Peninsula, Uplifted by the 2024 Noto Peninsula Earthquake Hideo MATSUTOMI and Takanobu KAMATAKI	47
A Study on the Origin of Event Deposits in the Coastal Areas of Yamagata and Akita Prefectures, the Eastern Margin of Japan Sea Takanobu KAMATAKI, Mikuto SUMIDA, Ryota WADA, Toshiyuki FUJIKI, Akihiko UEMATSU, Jyun-ichi AIHARA, Ryuma SAITO and Tomohiro KOMAGINO	53
Cumulative Probability Characteristics of Tide and Wave Estimates Obtained from the Climate Model d4PDF Weather Field Mikio SASAKI and Masato MINAMI	59
Relationships Between Place Names and Natural Disaster Risk in Areas Affected by the 2018 Western Japan Torrential Rainfall Megumi SHIROTA and Takanobu KAMATAKI	65
Damage at Ekito District of Akita City in the 2023 Akita Torrential Rainfall Noritoshi SAITO and Kazuya WATANABE	71
Characteristics of Human Casualty Locations Due to Heavy Rainfall Disaster Caused by Baiu Front in July 2024 Motoyuki USHIYAMA, Motohiro HONMA and Toshiaki MUKAI	77
Heavy Rainfall Disaster in Late July 2024 in the Northern Part of Yamagata Prefecture Isao MOTOYAMA, Kazuya MITSUJI, Makoto KUMAGAI, Yoshiyuki MURAYAMA, Tomoo HASHIMOTO, Masanari SATO, Naoyoshi IWATA, Shin-ichi KAGASHIMA, Kazue ISHIGAKI and Hiroshi YAGI	83
Damage of Houses and Civil Structures Due to Heavy Rainfall in Shonai and Mogami, Yamagata Prefecture on July 2024 Kazuya MITSUJI, Atsushi MIURA, Atsuhiko OGUNI and Isao MOTOYAMA	89
Flood Deposits in the Upper Alluvial Deposits of the Tsugaru Plain Akihiko DOMOTO, Koji UMEDA	95
Study on River Bed Change from Topographical Survey in Babame River Kohei YAMADA, Noritoshi SAITO and Kazuya WATANABE	101
Study on Saline Water Run-Up at Yoneshiro River Mouth Using Numerical Simulation Ryo YAMAZAKI, Noritoshi SAITO and Kazuya WATANABE	105
An Attempt to Reduce Wind Loads on Ventilated Exterior Wall Systems Using Pressure Equalization Yasushi UEMATSU and Keijiro HOSOKAWA	111
Discussion of Wind Force Coefficients for the Main Wind Force Resisting System of a Vaulted Free Roof Yuuki FUJISAWA, Wei DING, Yasushi UEMATSU	117
Study on Impact of Wind Turbine and Container by Tsunami Tsubasa IKEGAYA, Noritoshi SAITO and Kazuya WATANABE	123
Development of a Tsunami Evacuation System Using Vehicles in Toyama Based on Precedent Projects in Tohoku Region Hasune NUMAZAWA, Ryuto FUJISHITA and Shuichi KURE	129
Mesh-Based Optimal Evacuation Model for Safety Evaluation of Tsunami Evacuation Kazuto SATO, Shin-ya HORIAI and Makoto OKUMURA	135
A Method for Calculating the Effective Time Spent by External Supporters After a Disaster Based on Mobile Spatial Statistics Yuri SAWAMURA, Makoto OKUMURA and Hiromichi YAMAGUCHI	141
Tsunami Evacuation Vehicle Traffic Simulation Considering Pedestrian Following During in Snowfall and Snowy Season Shin-ya HORIAI and Makoto OKUMURA	147

Tohoku Research Group for Natural Disaster Science
